ABOUT KING & CO

King and Co have over 45 years of experience in trees and hedging. The Plant Healthy Nursery supplies a wide range of clients including; County Councils, Airports, Solar Farms, Developers, Wildlife Trusts, Farms, Golf Clubs, Schools and Landscapers in addition to private individuals.

The Nursery not only supplies UKISG bare root plants, but also has over 3000 container grown trees growing on site. During the season, root balled trees and hedging are also available for delivery nationwide. Tree planting accessories such as stakes, ties, biodegradable guards and fertiliser are also available.

The Nursery has voluntarily adopted the Plant Healthy standard to help protect the UK's plants, landscape and wildlife. This is critical for biosecurity to allow us to supply, grow and sell healthy plants. Our supply chain and practices are rigorously audited each year to check they meet these high standards. We are now entering our third year of certification. Buying trees and plants responsibly is only one way we can keep the UK safe from Plant Health threats such as Xyella and Oak Processionary Moth (OPM).

A recent Woodland Trust audit has confirmed King and Co's stock grown from UK seed is now UKISG assured. UK and Ireland Sourced and Grown accreditation means our UK grown stock from UK seed is exactly that. We are able to trace plants back through the growing cycle to the very seed that was collected. UKISG tree sourcing is key for developing resilient woodlands and reduces the risk of importing pests and diseases.

This catalogue contains pricing for bare root plants and tree planting accessories. If what you require is not listed here, please do get in contact with us.
